

RECORD OF DECISION AND FINDING OF NO SIGNIFICANT IMPACT

MONTANA FISH, WILDLIFE AND PARKS

GARTSIDE RESERVOIR FISHING ACCESS SITE FISHING PIER REPLACEMENT PROJECT

Montana Fish, Wildlife and Parks prepared an Environmental Assessment dated October 18, 2006. This Environmental Assessment addresses the extension of a handicap accessible fishing pier at Gartside.

Public comment was solicited and no comments were received.

On the basis of the information contained in the environmental assessment, and the absence of public objection, Fish, Wildlife and Parks has determined that adoption of the proposed action will have no significant environmental impact and the preparation of an environmental impact statement is not necessary.

The proposed action addresses the best management objectives of the agency and complies with the Department's mission by providing access to quality fishing opportunities for the physically challenged. This work is expected to be done during the summer of 2007.
